

User-friendly Pretreatment software that simplifies your workflows and maximizes compliance

Navigate complex regulations and detailed discharge requirements while streamlining your workflows. Our solution has everything you need to maximize industrial user compliance.

With SwiftComply, you get a customizable solution that consolidates your program under one system and promotes a culture of collaboration and transparency.

Why SwiftComply?

We understand no two pretreatment programs are the same. That's why we offer the best of both worlds: a customizable, modern solution backed by years of pretreatment management experience.

Promotes Collaboration

SwiftComply fosters a collaborative environment where compliance managers, inspectors, specialists, external data providers, and permitted industries can work together to fulfill their compliance obligations.

Is Easy to Adopt

We are dedicated to providing a platform that balances simplicity with power, guaranteeing user-friendliness alongside robust functionality. Our product team is led by industry veterans who deeply understand the specific requirements of pretreatment.

Maximizes Compliance

Our solution lays the foundation to seamlessly transition your program from reactive to proactive compliance management, while also ensuring full compliance with all of your data management requirements.

SwiftComply is a cloud-based solution, accessible through your web browser. Experience the simplicity of no additional hardware or software requirements.

All data and metadata are exclusively owned by your utility and are safeguarded with robust encryption, both in transit and at rest. We ensure top-tier security through session authorization, password, and validated email for login, to keep your information protected at all times.

Database Management

To ensure data accuracy, completeness, and reliability, we employ cutting-edge software and adhere to industry-leading data integrity best practices.

- ▶ Fast, cloud-based servers give instant access to information
- ▶ Control access rights to improve transparency & protect sensitive data

Industrial User Portal

Our portal empowers industrial users to self-manage their compliance obligations and reduces the administrative oversight burden for Compliance Managers.

- ▶ Self-reporting portal that validates data at source to reduce errors and unnecessary admin
- ▶ Instant data validation and tracking of all compliance and reporting activities

Reporting

Our reporting system provides customizable real-time & on-demand dashboards, alerts, and reports to enable in-depth data analysis.

- ▶ Configurable and Personalized Dashboards
- ▶ Annual Reporting features configured to meet NPDES e-Reporting Rule Phase 2 requirements

Integrations

SwiftComply is designed to easily integrate with existing technologies used by Pretreatment Programs.

- ▶ Seamlessly integrate with your existing tools
- ▶ Purpose-built and custom API capabilities
- ▶ Simplify billing and surcharge tasks with API integration

Communications

We have designed our solution to automatically communicate critical deadlines and tasks to internal teams and industrial users.

- ▶ Easily communicate with industrial users en-masse or individually
- ▶ Reduce the risk of overlooking critical tasks with automated notifications
- ▶ Automate compliance alerts and streamline your communications, follow-ups, and approval process workflows
