

## User-friendly FOG management software that simplifies your workflows and maximizes compliance

SwiftComply FOG is designed with one thing in mind – collaboration. Make it easy for your service providers and regulated businesses to manage their compliance requirements, so your team can focus on outreach, inspections and enforcement.

## Why SwiftComply?

We're environmental professionals just like you. Our team includes former city employees, inspectors, and technologists who are passionate about fostering community-based environmental compliance.

### Manage everything from one platform

SwiftComply promotes a collaborative environment by providing your team, service providers, and regulated businesses with the tools and data to manage all of their core compliance tasks under one connected system.

### Scale your customer outreach

Trigger timely and relevant communications that keep your customer engaged, informed, and ready to take action when required. With SwiftComply, it's easy to deliver personalized and timely notifications.

### Empower your entire team

SwiftComply is designed to save you time. Automate reports, trigger compliance notifications, and manage forms and permits electronically. No more generating invoices or filling in spreadsheets.

## SwiftComply is a cloud-based solution accessed through a web browser without requiring additional hardware or software on the city's side.

All data and metadata are exclusively owned by your utility and are safeguarded with robust encryption, both in transit and at rest. We ensure top-tier security through session authorization, password, and validated email for login, to keep your information protected at all times.

### Reporting

We utilize cutting-edge software to help you track all of your essential compliance metrics and gain valuable insights into the day-to-day running of your program.

- ▶ Track compliance in real-time.
- ▶ Create custom reports and dashboards.
- ▶ Utilize custom properties across the system.

### Pump Outs

FSEs, service providers, and city users can upload pump-out documents directly to the database, ensuring real-time tracking and data accuracy.

- ▶ Filter pump-outs and export into detailed reports.
- ▶ Send notifications for pump-out due dates.
- ▶ Easily access an archive of FSE pump-out records.

### Inspections

Efficiently schedule, manage, and complete inspections with customizable templates, real-time updates, and robust field capabilities.

- ▶ Editable inspection templates.
- ▶ Customizable scheduling and assignment.
- ▶ Digital signatures for field inspections.

### Enforcements

Issue, manage, and resolve enforcements, with custom templates, efficient tracking, and comprehensive filtering options.

- ▶ Customizable enforcement templates.
- ▶ Email or print enforcements.
- ▶ Track enforcement statuses and due dates.

### Communications

Automate notifications, track conversations, and ensure follow-ups, making it easy to stay connected and keep everyone informed.

- ▶ Centralize emails for streamlined communications.
- ▶ Schedule and automate compliance reminders.
- ▶ Send one-time ad-hoc messages as needed.

### Customer Portal

FSEs can report their pump outs, access their compliance history, and receive notifications, ensuring up-to-date records and reducing administrative burden for city regulators.

- ▶ Self-service enrollment and profile management.
- ▶ Submit and track pump out reports.
- ▶ Receive real-time compliance notifications.
