

# Pretreatment Software that Reduces Risk — and Your Workload

SwiftComply connects your entire compliance workflow — from permitting to enforcement — with built-in automation and regulatory logic that reduces risk, strengthens compliance, and frees staff to focus where it counts.

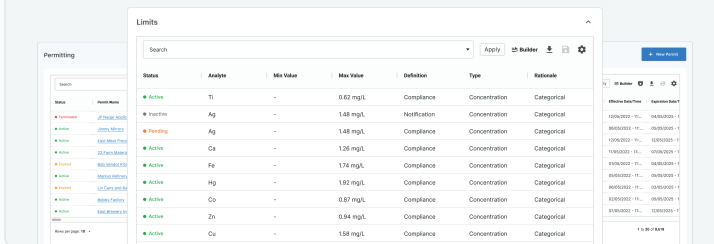

## Why SwiftComply?

Most systems force you to adapt your workflows to fit their tools. SwiftComply is built by pretreatment experts to reflect how compliance actually works on the ground.

### Tailor the system to your local requirements

Configure permits, limits, and tasks to match local ordinances, state mandates, and EPA rules with no workarounds or extra spreadsheets.

### Automate tasks that drain your time

Set your rules once and let the system handle the rest, from generating permits and scheduling sampling events to flagging violations when reports come in.

Select Permit Template

Auto-fill Compliance Data

### Give IUs tools that improve their data

The IU portal surfaces requirements, deadlines, and past reports, helping industrial users stay on track and submit cleaner data.

#### Submit Sample Report

Upload lab results and required documents

[Submit Report](#)

#### View Permit

See discharge limits, sampling requirements, and conditions

[Access Your Permit](#)

# Everything you need to manage pretreatment in one place

Manage permits, track sampling, resolve violations, and generate reports, all in a single connected system.

## Permit Management

Create, update, and store permits that reflect local limits, schedules, and legal controls.

## Sampling & SMRs

Track events, upload results in bulk, and evaluate compliance automatically.

## Violation Tracking

Log, categorize, and follow up on nonconformance types with audit-ready records.

## Enforcement Actions

Connect violations to enforcements and document the full resolution lifecycle.

## IU Portal

Give industrial users secure access to requirements, history, and data submission tools.

## Reporting

Search, filter, and export results across permits, reports, and limits from a single source of truth.

## Trusted by Pretreatment Leaders
